**SCANDINAVIA'S FIRST AND
THE WORLD'S MOST BEAUTIFUL
ELECTRIC CAR RALLY**

From **ODENSE** to **TRONDHEIM**

Experience a spectacular travel route from the soft landscape of Denmark, through Sweden's open west coast with islets and reefs, to open valleys and steep mountain roads in Norway. WOW!

This will be an electric adventure on four wheels! There will be opportunities for photographic pearls in a row. You have to charge both car and camera, because this will be this year's SoMe highlight.

Imagine up to 50 electric cars in a row over the Storebælt and Øresund bridges, with the west coast and the bare, smooth rocks in Bohuslän as a background, Ørneveien, Trollstigen and The Atlantic Road and much, much more!

This could be this year's "must do" and explosion of experiences. Do you dare to stay at home?

* - (alt. 1.-5. september, if restrictions due to Covid-19 virus) ** - guidelines for electric car, driver and co-driver - we follow the FIA's guidelines

5 legs

5 rally legs where it's important to drive closest to the ideal time, best utilization of power consumption, best picture, best video, m.m.

50 e-cars(max)

Anyone who wants to can participate, but the requirement is: a registered electric car, driver and co-driver. **
Registration consecutively.
